EXPERIENCE

Ally Financial, Charlotte, NC   8/2020 - Present
Test Engineer
Lead Test Engineer on face paced Agile scrum teams. Created comprehensive in-sprint Cypress automated test development suite integrated into mature React typescript web application. Creation of test scripts, plans, and automation at high-speed for rapid production deployments. Documentation and development of shared testing libraries, utilities, and CI pipelines to enhance testing and development experiences.
- Cypress automation development for full in-sprint automation, updates and maintenance for automation libraries for use across the organization
- Test management, planning, and execution for face-paced agile production deployments

Ettain Group, Charlotte, NC   2/2020 - 8/2020
Develop in Testing
Member of Production Certification team for a large nation bank. Responsible for testing native mobile banking apps including new features, regression, automation testing/development, and API service testing for every production build for iPhone, Android and tablet devices.
- Automation development for a custom Java/Appium framework to control and run regression scripts on mobile devices and apps
- API service testing, functional testing for new features and regression as they are deployed to production environments

Cognizant, Charlotte, NC   6/2016 - 2/2020
Quality Assurance Engineer
Member of an Agile scrum team, as a Quality Assurance tester, for multiple large bank's web applications. Functional and regression testing for sprint stories, enhancements, and releases. In-sprint automation for sprint stories and regression suites using java, javascript, selenium, postman, cypress and cucumber/gherkin.
- Automation efforts including Java selenium/cucumber scripting, cypress cucumber/gherkin BDD framework, and API automation with Postman
